Svenska kraftnät's explanation of above data

The numbers for two-price income production are extracted from SvK's settlement system. Income fees, reserve costs, operating expenses are extracted from Svenska kraftnät's accounting system.

Income fees include fee of measured production and consumption, monthly fee and volume fee on imbalance of consumption.

Reserve costs include costs for disturbance reserve and primary regulating reserves.

Operating expenses include costs for personnel, administration, IT and depreciations.

Financial result due to adjustments for correction in the settlement has not been accrued in the accounting system.
